List of API Requests

Registration

1. **Register:**
 - a. Merchant as RA Full API (merchant will act as Registration Authority and must have official connection to **Dukcapil** for verification purpose, then merchant will send 7 user information to privy)
 - b. Privy as RA Full API (if merchant able to provide 7 user information <Name, NIK, DoB, email, phone No, photo of KTP, photo of Selfie>)
 - c. Using Landing Page Privy (at least merchant can provide data Name, email and phone No)
2. **Resend Registration:** in case for soft reject in registration process, merchant can revise registration data based on reject reason.
3. **Check Status:** Check status of registration based on reference number and register token

OTP

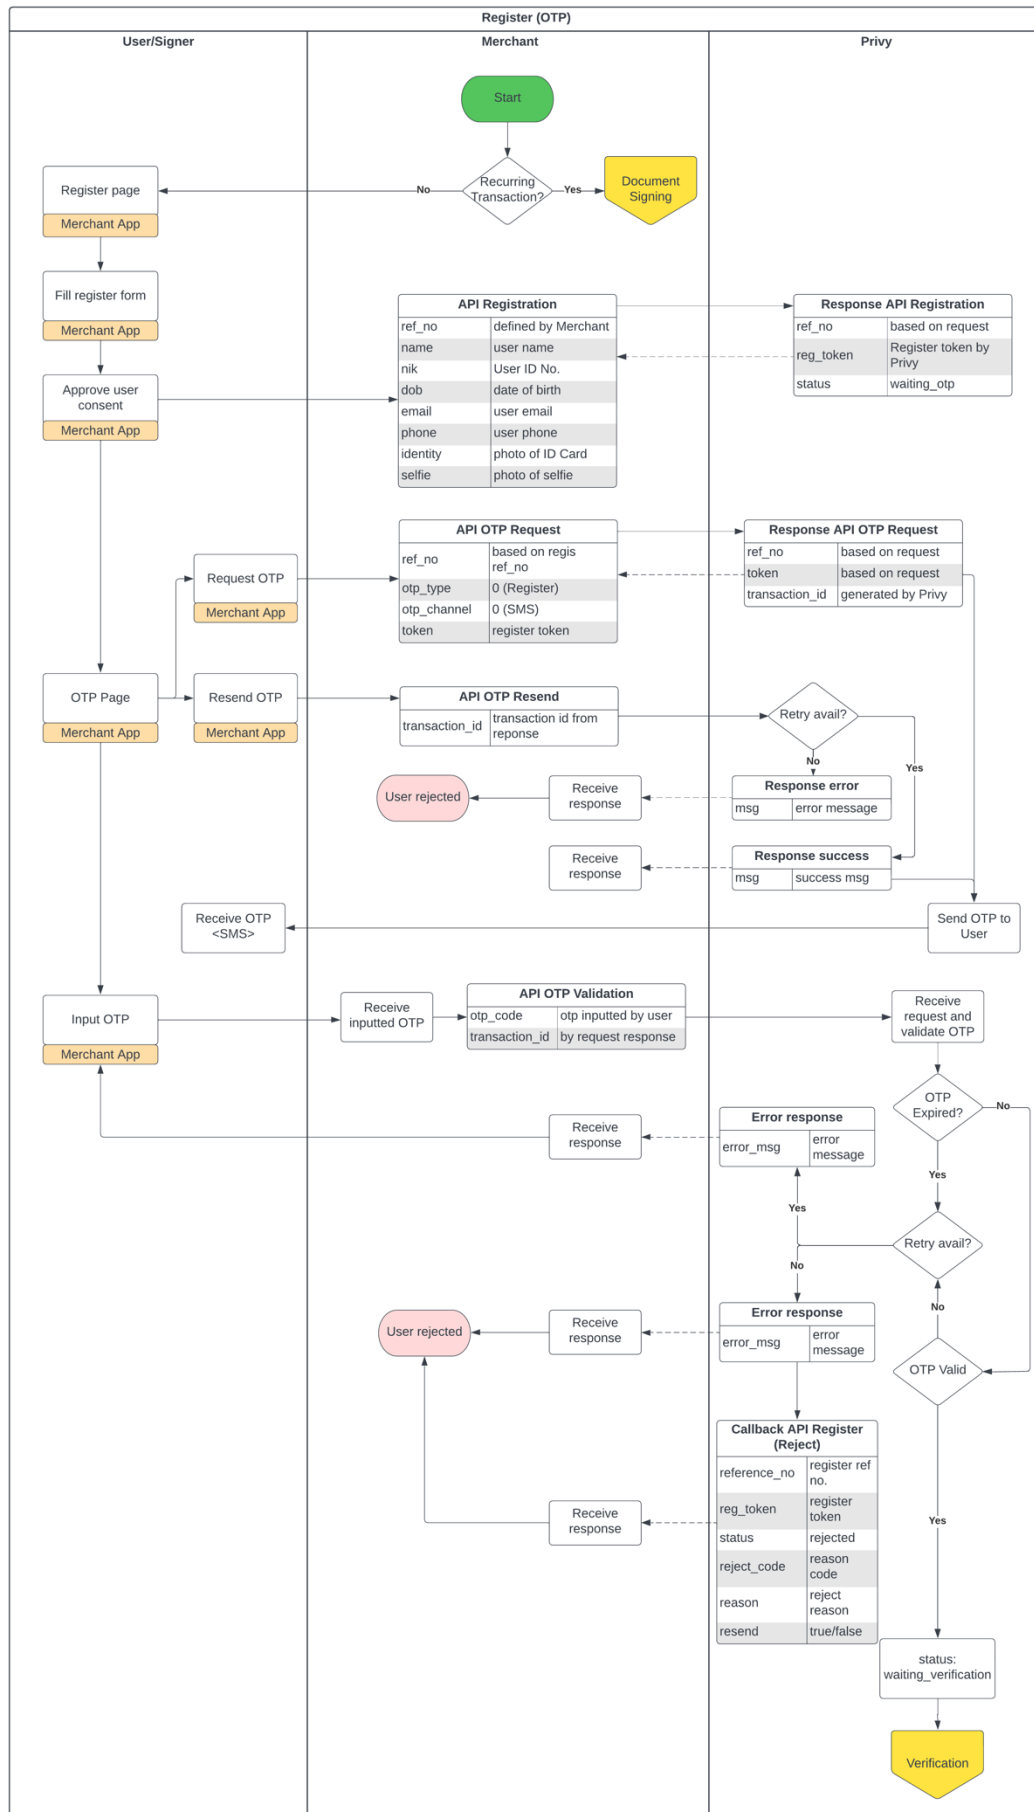

1. **OTP Request:** Request OTP for registration or document signing purpose (will be determined by param **otp_type**), OTP will be send to end-user by SMS or Email (based on param **otp_channel**)
2. **OTP Validation:** OTP inputted by end-user must be validated using this request
3. **OTP Resend:** Merchant able to request for re-send OTP using this request as long as resend attempt has not reached max resend attempt available

Document

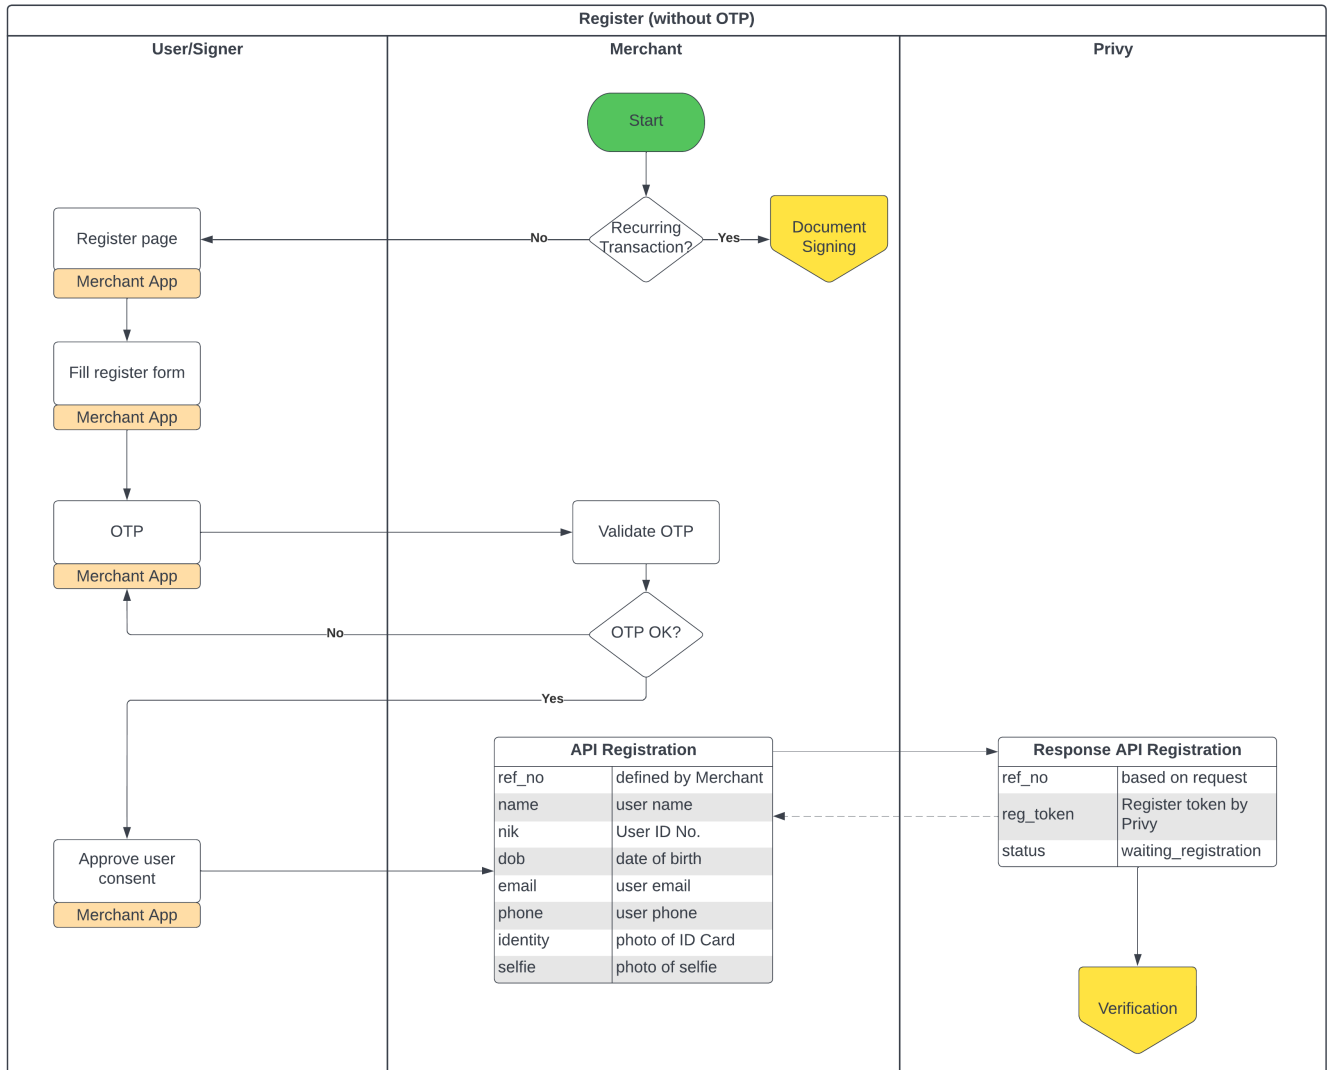

1. **Upload Document:** Upload document with its information (document PDF file, signer, signature placement, e-Meterai (optional), etc)
2. **Check Document Status:** Check document status by reference number and document token
3. **Document History:** Check document history by user/ signer's activities
4. **Revoke Document:** If document status is not completed (all signer has signed the document) yet, merchant can revoke (cancel) document
